SLOW, NO WAKE, BOATING

North Lake is now more than 3 inches over the high water elevation which requires "slow, no wake, boating". The water will probably rise for another 2 to 3 days after this rain event before it reaches its peak. A green buoy will be placed between the 2 lakes which also indicates "slow, no wake".

We will send an email and remove the green buoy when the water is under the high water mark. Please be considerate of your friends and neighbors and do your boating at a slow, no wake speed until the water level recedes.
