NEWSLETTER

Dredge Channel Between Big and Little Lakes

The Dredging Project on the channel between the Big and Little Lakes has been delayed. We will let you know when it is rescheduled.

Lake Stewardship Committee Survey

Inadvertently, the Lake Stewardship Committee Survey was mailed without a postage paid return envelope. It has been re-mailed with the return envelope, and you should receive it early next week.

Please dispose of the first Survey you received.

Aquatic Plant (AP) Pickup Program

Due to an engine problem on the pontoon boat used to pickup AP's from piers, not all AP's were picked up on Thursday, August 20, 2020. The problem was partially resolved, and the pontoon picked up the AP's from the remaining piers on Friday, August 21, 2020.

The last day of AP pickup will be Thursday, August 27, 2020, subject to weather and equipment. The alternate pickup day will be Friday, August 28, 2020.

Dead Cisco Fish

We have had reports of dead Cisco Fish on the Little Lake. These fish require cooler water and a reasonable dissolved oxygen (d.o.) level. Our tests of the water with our DO/Temperature Meter are showing insufficient d.o. levels at the levels of the Lake that have cooler water, thus the Cisco die off.
