NORTH LAKE MANAGEMENT DISTRICT
NEWSLETTER

Fish Management

NLMD will be stocking 1,000 Crappies, 2,500 Perch, and 2,500 Walleyes this fall. North Lake has the DNR permit for this stocking program. Managing a balanced ecosystem of game and pan fish along with reducing the North Lake Carp population is our goal. Carp increase the water turbidity, up-root vegetation, and disturb sediment releasing phosphorus which contributes to poor oxygen levels in the water and more aquatic plant growth. Zooplankton which is part of the diet of Carp help lake water stay clear.

Please send your donation to our treasurer for the 2020 fish stocking program:

Thank you for your contribution to a worthy cause and remember your contributions are tax deductible if you itemize.

Lake Stewardship Phase 2 Survey

If you have not completed your Phase 2 survey on boating, please do so now. The responses thus far have been good, but we would like to hear from as many property owners as possible, so we can evaluate the Voluntary Boating Rules.
