Special NLMD Meeting

There will be a Special NLMD meeting on Wednesday, September 29, 2021, at 6:30 p.m. at North Lake School—All Purpose Room. There will be only one topic – purchase of North Lake Development Group (NLDG) Property off of Highway 83 for potential public access site.

Further information will be forwarded to you soon.

Ammonia Levels

Some of you received an E-mail from the Didier's concerning ammonia levels in North Lake and a proposed study by a UWM professor for \$60,000.

The Didier's want to have a \$60,000 study performed based on a one-day study at one location – Adams Bar. Such a proposal is inappropriate.

We are taking water samples at various locations and sending them to the Oconomowoc Sanitary District for ammonia level testing. If these samples show high ammonia levels, appropriate action will be taken.

The problem for North Lake water quality is our inlets (four) that transport silt and phosphorus into the Lake. NLMD and its partners (Tall Pines and Oconomowoc Water Protection Program) have been working on this problem for some time. It is a very big issue and very costly.

Used Outboard Motor

We are still in need of a used outboard motor (at least 40HP) that someone would be willing to donate or sell for a reasonable price. The current motor on the Aquatic Plant Pontoon Boat is failing, and it is too expensive to repair. Please contact Gary Stippich at 262-844-9446, if you know of an available motor.

Commissioners, NLMD
