Dredging Update – November 10, 2022

We are still \$126,200 from our goal to be able to complete all of the sediment removal from the North bays of the lake. Now is the time to donate! If we run out of money, the project will end and the dredge will leave. We only have enough money to fund a few more weeks.

Next week we will be publishing a list that acknowledges the generous property owners that have met or exceeded the suggested minimum donation. The suggested minimum donation for property owners in the dredging area is \$5,000 and the suggested donation for all property owners outside of the dredging area is \$2,500. If everyone donates the suggested amount, the entire project will be funded.

We have already sent 60,000+ cubic yards to the dewatering basin at the Halquist pit. The project is about 50% complete.

Caution: Do not cross the dredge pipeline. The pipeline moves, it sinks when it is full of sediment and is hard to see. Right now, the dredge pipeline goes across the entire North side of the lake. If you need to remove a boat from the lake, please work with the Michels employees at the launch site to get help crossing the pipeline.

THANK YOU to Tim and Barbara Michels for their significant financial support of this project. Without their assistance, this project would not have happened!

The dredge head is guided by GPS

The dredge head has a 30'+ reach
